

The Weber School

Sophros Nitria™ Rubber Flooring

Product: Sophros

Material: Nitria

Industry: Fitness

Location: Atlanta, GA

The Eitan Force Athletic Complex at The Weber School in Atlanta expands opportunities for athletics, fitness, and wellness with spaces designed to support students both on and off the court. The facility includes competition and practice gyms, locker rooms, classrooms, and dedicated areas for fitness, conditioning, and weight training.

Zandur flooring provides a durable foundation for the strength and conditioning space, where equipment, weights, and daily activity demand a surface built for performance. The blue flooring complements Weber's school identity, while contrasting inset training areas help visually define zones within the open fitness environment.

Comfort underfoot, impact absorption, slip resistance, and durability make the flooring well suited to a space designed for year-round training. The result is a clean, functional environment that supports Weber's broader commitment to student fitness, athletic development, and wellness.

Nitria Rubber Benefits

Slip Resistant

Nitria flooring provides excellent slip resistance, supporting confident movement in demanding commercial environments.

Low Reflectivity

A matte, low-glare surface minimizes distracting reflections and supports visual comfort, particularly in healthcare, senior living, education, and other environments where glare can be a concern.

Durable

Nitria flooring is engineered for demanding commercial use, with color and pattern extending throughout the product to help maintain its appearance over years of service. Zandur Nitria flooring is backed by a 20-year wear-through warranty.

Acoustically Beneficial

The inherent resilience of Nitria rubber helps reduce the sound of foot traffic and contributes to more comfortable interior environments. Acoustic performance varies by product construction and thickness.

Comfortable Underfoot

Nitria combines resilience with underfoot comfort, creating a surface that feels warmer and more forgiving than many hard flooring materials and can help reduce fatigue in spaces where people stand or walk for extended periods.

Easy to Maintain

Nitria is designed for simplified care without the heavy initial maintenance associated with traditional rubber flooring. Routine cleaning can be performed with damp mopping or an auto-scrubber and appropriate mild cleaners, without the need for harsh chemicals or routine finishes.

Low Life-Cycle Cost

Long service life, simplified maintenance, and reduced need for finishes help lower costs over the life of the floor while reducing the disruption associated with intensive maintenance and premature replacement.

Healthier Material Chemistry

Nitria is PVC-free and plasticizer-free, with low-VOC emissions and Declare LBC Red List Free material transparency. Its cleaner material chemistry supports healthier indoor environments without compromising commercial performance.
